L0637 Custom Fitted  
**SUGGESTED**  
L0650 OTS

The new GALAXY™ is ideal for those patients requiring maximum A-P compression and support, but cannot tolerate rigid braces. Easy donning & doffing. A-P and abdominal compression can easily be increased or decreased with the fastening tabs. Although, the adjustable anterior and posterior plastic panels contour and conform to patients of various sizes, shapes, and lordotic curves, further modifications may be made to the plastic panels to achieve a custom fit.

**Typical Indications** • Post-Op Spinal Lumbar Stabilization • Burst Fx • Chronic Back Pain • Compression Fx • Degenerative, Herniated or Bulging Disc • Spinal Instability • Post-Op Disc Surgery • Spondylolysis • Spondylolisthesis • Spinal Stenosis • Facet Syndrome • Tumors or Inflammation • Post-Op Laminectomy
