4X	49" - 56"

The Stealth™ TLSO offers all the features and benefits of the Stealth Line plus provides motion restriction for the thoracic regions in addition to the lumbar regions. The posterior extends from the sacrococcygeal junction to just inferior of the scapular spine wrapping around the trunk to provide lateral strength. The anterior extends from symphysis pubis to the sternal notch and includes your choice of Anterior Thoracic Extension (ATE) which restricts forward flexion and encourages proper posture to promote patient recovery.
