

ACL MAX OPTEC

PATIENT FITTING INSTRUCTIONS

1. Sit on the edge of a chair, the brace is put on the knee with the +/- 75° of flexion. Position the joint so that the center of the hinges are one inch above the joint line (see arrow). Make sure that the brace is not twisted on the knee.

2. First, fasten the bottom calf strap (#1), then the upper thigh strap (#2).

3. Secure the upper calf strap (#3) which is well placed above the belly of the calf muscle for good suspension. Then the tibial strap (#4)

4. Now tighten the back thigh strap (#5), then the front lower thigh strap (#6).

5. When all strapping is complete, the hinge should center just above the top of the knee cap and one inch above the joint line.

6. Open the plastic hinge cover, select a desired degree of extension (0°, 15°, 30°, 45°, 60°) or flexion (0°, 15°, 30°, 45°, 60°, 90°, 120°). The dial-in pins are easily detached or inserted. Both medial and lateral pins must be identical in degree.

Care & Guidelines

IDEAL FOR:

- ACL/ PCL Injury • Complex Instability (MCL/ LCL)
